DEPLOY IN KUBERNETS CLUSTER:

The screenshot displays the Kubernetes Dashboard interface. The top navigation bar shows the 'default' namespace and a search bar. The left sidebar lists various Kubernetes resources under three categories: Workloads, Service, and Config and Storage. The 'Deployments' resource is selected under the Workloads category. The main content area features two charts at the top: 'CPU Usage' and 'Memory Usage', both displaying 'Waiting for more data to display chart...'. Below these charts is a table titled 'Deployments' with columns for Name, Images, Labels, and Pods. A single deployment named 'jobportal' is listed, with a green status indicator, a 'Show all' link under the Images column, another 'Show all' link under the Labels column, and '1 / 1' under the Pods column. The bottom of the image shows a Windows taskbar with the search bar and several application icons.

Name	Images	Labels	Pods
jobportal	Show all	Show all	1 / 1
